Lecture 10 Central Bank

- Origins of the Federal Reserve System (FED)
- Structure of the FED
- Central Bank Independency
 - how independent is the FED
 - should the FED be independent?
- Central Bank Behavior
- Structure and Independence of the European Central Bank (ECB)
- Central Banks around the World
 - Bank of Canada, Bank of England and Bank of Japan
- The People's Bank of China

Origin of the FED

- Resistance to establishment of a central bank
 - Fear of centralized power
 - Distrust of moneyed interests
- No lender of last resort
 - Nationwide bank panics on a regular basis
 - Panic of 1907 so severe that the public was convinced a central bank was needed
- Federal Reserve Act of 1913
 - Elaborate system of checks and balances
 - Decentralized

Structure of the Federal Reserve System

- The writers of the Federal Reserve Act wanted to **diffuse power** along regional lines, between the private sector and the government, and among bankers, business people, and the public
- This initial diffusion of power has resulted in the evolution of the Federal Reserve System to include the following entities:

The Federal Reserve banks, the Board of Governors of the Federal Reserve System, the Federal Open Market Committee (FOMC), the Federal Advisory Council, and around 2,900 member commercial banks.

Figure 1 Structure and Responsibility for Policy Tools in the Federal Reserve System

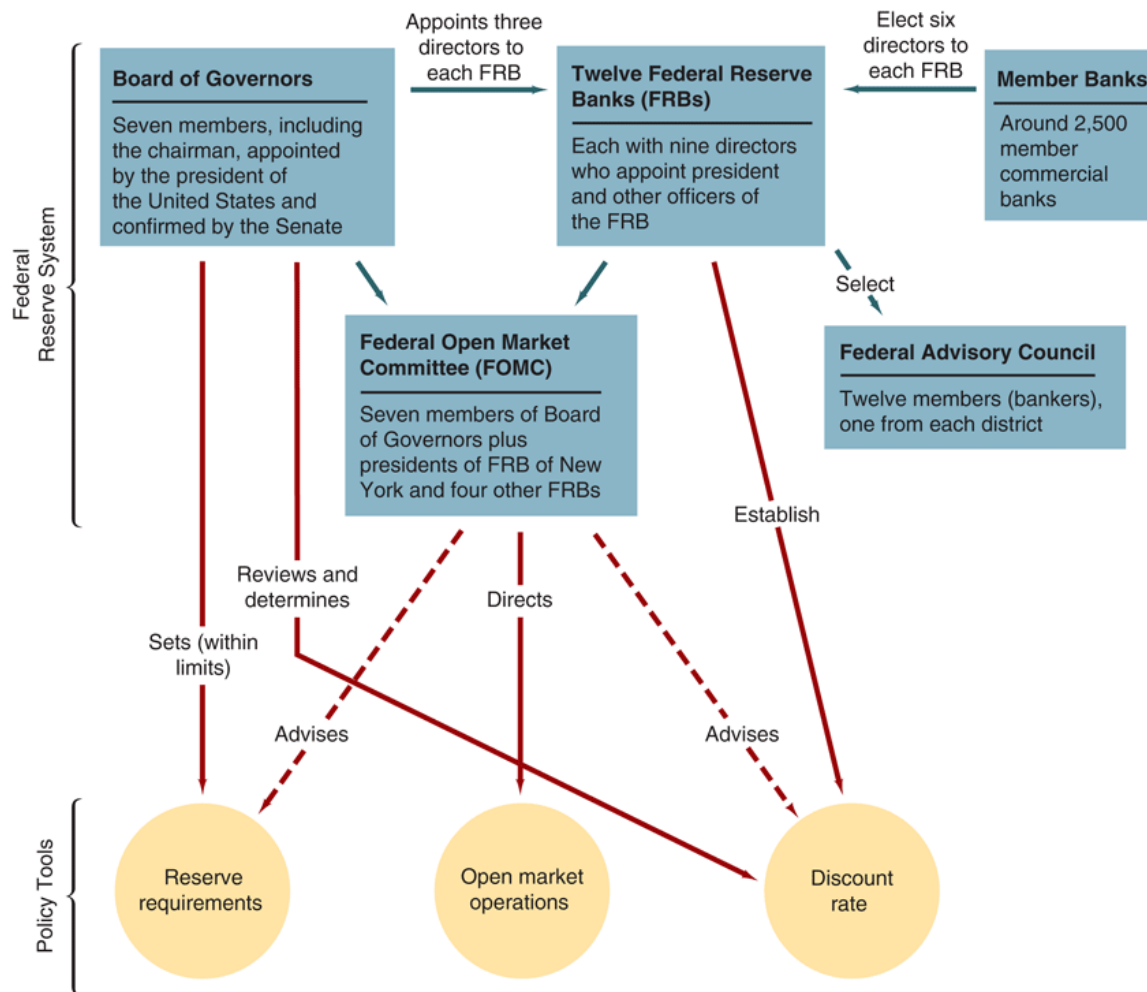

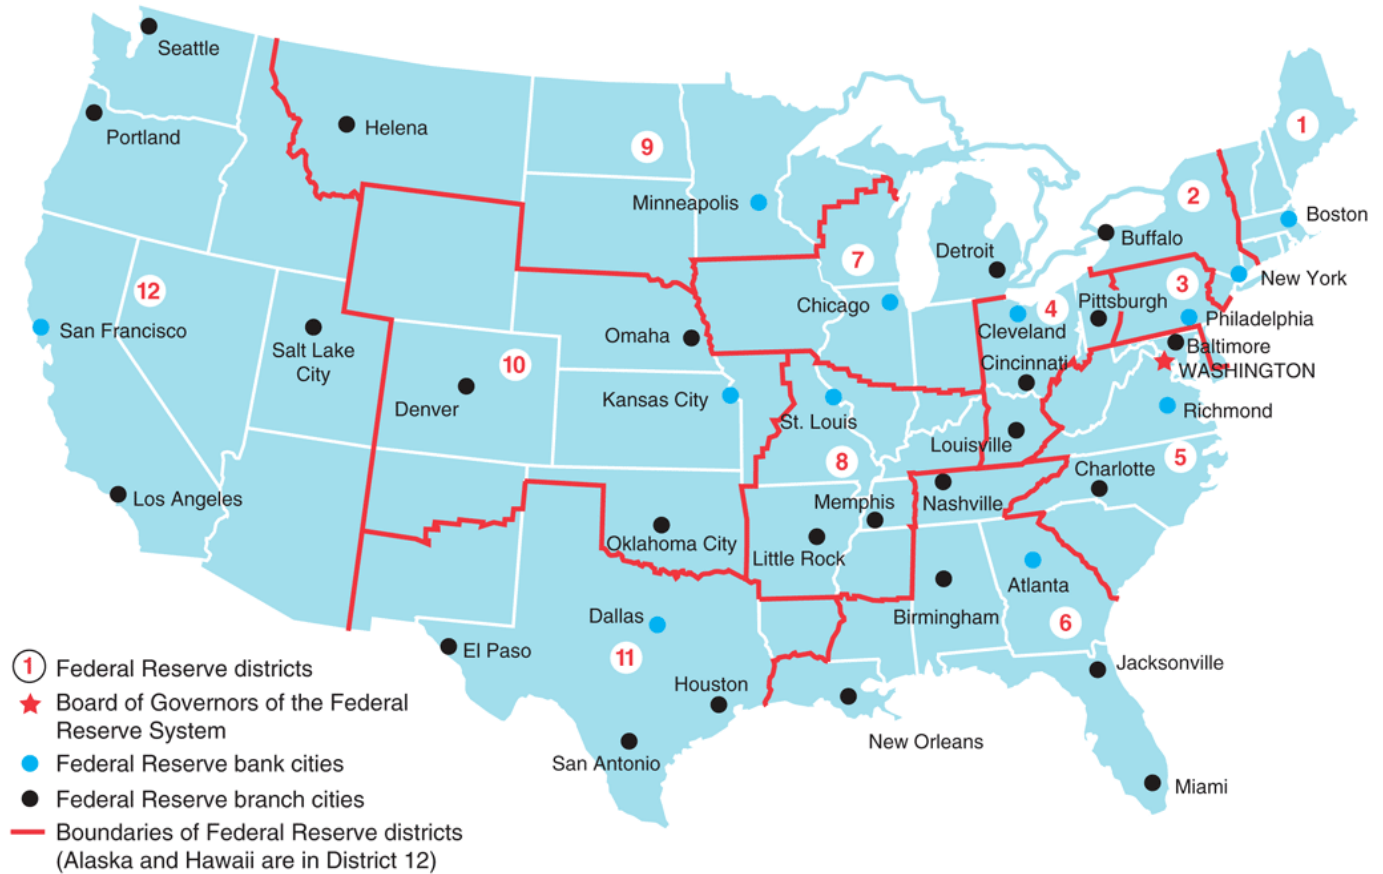

Figure 2 Federal Reserve System

Structure of the Federal Reserve System

- Quasi-public institution owned by private commercial banks in the district that are members of the Fed system
- Member banks elect six directors for each district; three more are appointed by the Board of Governors
 - Three A directors are professional bankers
 - Three B directors are prominent leaders from industry, labor, agriculture, or consumer sector
 - Three C directors appointed by the Board of Governors are not allowed to be officers, employees, or stockholders of banks
 - Designed to reflect all constituencies of the public
- Nine directors appoint the president of the bank subject to approval by Board of Governors

Federal Reserve System and Monetary Policy

- Clear checks
- Issue new currency
- Withdraw damaged currency from circulation
- Administer and make **discount loans** to banks in their districts
- Evaluate proposed mergers and applications for banks to expand their activities
- Act as liaisons between the business community and the Federal Reserve System
- Examine bank holding companies and state-chartered member banks
- **Collect data on local business conditions**
- **Use staffs of professional economists to research topics related to the conduct of monetary policy**

Federal Reserve System and Monetary Policy

- Directors “establish” the **discount rate**
- Decide which banks can obtain **discount loans**
- Directors select one commercial banker from each district to serve on the Federal Advisory Council which consults with the Board of Governors and provides information to help conduct monetary policy
- Five of the 12 bank presidents have a vote in the Federal Open Market Committee (FOMC)

Member Banks

- All national banks are required to be members of the Federal Reserve System
- Commercial banks chartered by states are not required but may choose to be members
- Depository Institutions Deregulation and Monetary Control Act of 1980 subjected all banks to **the same reserve requirements** as member banks and gave **all banks access** to Federal Reserve facilities

Board of Governors of the Federal Reserve System

- Seven members headquartered in Washington, D.C.
- Appointed by the president and confirmed by the Senate
- 14-year non-renewable term
- Required to come from different districts
- Chairman is chosen from the governors and serves four-year term

Duties of the Board of Governors

- Votes on conduct of open market operations
- Sets reserve requirements
- Controls the discount rate through “review and determination” process
- Sets margin requirements
- Sets salaries of president and officers of each Federal Reserve Bank and reviews each bank’s budget
- Approves bank mergers and applications for new activities
- Specifies the permissible activities of bank holding companies
- Supervises the activities of foreign banks operating in the U.S.

Chairman of the Board of Governors

- Advises the president on economic policy
- Testifies in Congress
- Speaks for the Federal Reserve System to the media
- May represent the U.S. in negotiations with foreign governments on economic matters

Federal Open Market Committee (FOMC)

- Meets eight times a year
- Consists of seven members of the Board of Governors, the president of the Federal Reserve Bank of New York and the presidents of four other Federal Reserve banks
- Chairman of the Board of Governors is also chair of FOMC
- Issues directives to the trading desk at the Federal Reserve Bank of New York

Meeting of the FOMC

- Report by the manager of system open market operations on foreign currency and domestic open market operations and other related issues
- Presentation of Board's staff national economic forecast
- Outline of different scenarios for monetary policy actions
- Presentation on relevant Congressional actions
- Public announcement about the outcome of the meeting

Why the Chairman of the Board of Governors Really Runs the Show

- Spokesperson for the Fed and negotiates with Congress and the President
- Sets the agenda for meetings
- Speaks and votes first about monetary policy
- Supervises professional economists and advisers

How Independent is the FED?

- Instrument and goal independence.
- Independent revenue
- Fed's structure is written by Congress, and is subject to change at any time.
- Presidential influence
 - Influence on Congress
 - Appoints members
 - Appoints chairman although terms are not concurrent

Should the FED be Independent?

- The Case for Independence
 - The strongest argument for an independent central bank rests on the view that subjecting It to more political pressures would impart an inflationary bias to monetary policy
- The Case Against Independence
 - Proponents of a Fed under the control of the president or Congress argue that it is undemocratic to have monetary policy (which affects almost everyone in the economy) controlled by an elite group that is responsible to no one

Should the FED be Independent?

- One view of government bureaucratic behavior is that bureaucracies serve the public interest (this is the *public interest view*). Yet some economists have developed a theory of bureaucratic behavior that suggests other factors that influence how bureaucracies operate
- The theory of bureaucratic behavior may be a useful guide to predicting what motivates the Fed and other central banks
- Theory of bureaucratic behavior:
 - objective is to maximize its own welfare which is related to power and prestige
 - Fight vigorously to preserve autonomy
 - Avoid conflict with more powerful groups
- Does not rule out altruism

Structure and Independence of the European Central Bank

- Patterned after the Federal Reserve
- Central banks from each country play similar role as Fed banks
- Executive Board
 - President, vice-president and four other members
 - Eight year, nonrenewable terms
- Governing Council
- Difference with the FED
 - National Central Banks control their own budgets and the budget of the ECB
 - Monetary operations are not centralized
 - Does not supervise and regulate financial institutions

Governing Council

- Monthly meetings at ECB in Frankfurt, Germany
- Twelve National Central Bank heads and six Executive Board members
- Operates by consensus
- ECB announces the target rate and takes questions from the media
- To stay at a manageable size as new countries join, the Governing Council will be on a system of rotation

How Independent is the ECB?

- Most independent in the world
- Members of the Executive Board have long terms
- Determines own budget
- Less goal independent
 - Price stability
- Charter cannot be changed by legislation; only by revision of the Maastricht Treaty

Other Central Banks

- Bank of Canada
 - Essentially controls monetary policy
- Bank of England
 - Has some instrument independence.
- Bank of Japan
 - Recently (1998) gained more independence
- The trend toward greater independence
